

McDermott AquaPro R.O. Systems

- Sparkling Clear Water
- Crystal Clear Ice Cubes
- Environmentally Responsible
- Pure Water Without the Bottle

AquaPro

Effectively Used to Reduce

- Nitrates
- Lead
- Arsenic (pentavalent)
- Cyst (cryptosporidium)
- Fluoride
- Radium 226/228
- and more*

The AquaPro Series® Reverse Osmosis Drinking Water System reduces harmful impurities* and turns common tap water into the fresh, quality water that nature intended us to drink. A four-stage system filters water at the molecular level. Drawn water passes through a final carbon filter to remove any unwanted tastes or odors. The result is simply fresh, natural tasting water.

- Wisconsin state-approved unit
- Built-in monitor to check performance
- Easy to replace membrane and filters
- Premium, long-necked chrome faucet complements decor while still capable of filling large pots
- Pristine, flavorful coffee, tea and juice; better tasting soups, sauces and meals when prepared with R.O. water
- Cost effective — the daily cost of bottled water will no longer be a concern
- Convenient — fresh, clean water ready at your tap

McDermott AquaPro R.O. Systems

The AquaPro Series® reverse osmosis drinking water system offers a convenient, affordable, environmentally sound alternative to bottled water. This system is designed to filter water at the molecular level to reduce impurities*; remove odors and improve the appearance and taste of your tap water. Your McDermott dealer can help you determine the best R.O. system for your household so you can enjoy the pure taste of bottled water, right at the tap.

Advanced Features:

Pre-Filter

- Captures large particles, such as silt, rust or scale
- Extends the life of the R.O. membrane
- Contains activated carbon that reduces chlorine particles that can harm the system's membrane

Membrane

- Traps and removes most particles too small for the prefilter to catch
- Flushes dissolved solids and other contaminants out of the system

Final Polishing

- Final filtering prior to reaching the tap
- Two carbon filters reduce any remaining tastes and odors
- Imparts the final "polish" to your water

Holding Tank

- Stores approximately two gallons of fresh, clean water
- Automatic shut-off maintains fresh supply

Experienced Company ...

For over 60 years, the water system experts at McDermott's have been supplying Wisconsin and Upper Michigan homes with the finest in water supply and water treatment equipment. Through these years, our partner has been your hometown plumber and water treatment dealer.
