

# Are You Interested in Building Your Bottom Line?

Look No Further! Water Treatment is a Profitable Business that Performs in Replacement & New Construction, Residential & Commercial Applications.

**McDermott has partnered with Industry Leader Water-Right to provide you with a complete, Wisconsin State Approved line of Water Treatment Equipment.**

**AquaSoft Pro** – competitively priced softener uses the LOGIX Series Control for peak performance.

**AquaSoft Pro Plus** – the gold standard of softeners, uses the proven, high flow Autotrol 268 valve with the LOGIX Series Control for outstanding results.

**AquaSoft CL** – intelligently controlled softener uses the Clack Control Valve with Six (6) Levels of Display keeping track of usage and performance.

**McDermott Sanitizer Plus** – THE Solution for problem water! Not only corrects hardness, iron and odor problems but sanitizes the unit with a patented chlorine generator!

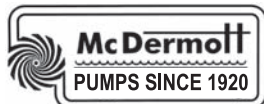

**AquaPro Reverse Osmosis System** – supplies pure water without the “bottle!” This affordable point-of-use (POU) treatment system uses multiple filters and an R.O. membrane to remove odors and improve the appearance and taste of tap water.
