# The more things change the more they stay the same...

We have all heard that saying before. Usually when we look askance at what our teen age kids are doing while remembering our own teen age years...

When I apply the saying to McDermott Pumps I believe it is spot on. Over the last year we have had our share of "changes". Among them our Lyon Pump relocation to Watertown and name change to McDermott Pumps. Plus we consolidated our Wausau location into our Green Bay Branch. Major changes indeed!

But as the saying goes even as things change, "...the more they stay the same." We are pleased to say that even with all the changes here at McDermott's we have kept our eye on the ball. We have made changes and adjustments and we have "tweaked", but all with the same goal in mind – ***maintain the high level of service our customers have come to expect from us.***

You'll see from a review of our August 2011 Dealer Price Book everything is where you'd expect it and more. We've added some exciting new products...

- On page 31 we added 2" Schedule 120 PVC Drop Pipe from Johnson Screen. Matched with a Stainless Steel Coupling this is the cost competitive, premium solution for your larger pump installations.
- On page 38 check out our two (2) new series of poly septic tanks from Infiltrator. Including a 1060 gallon unit that ships in a 'clamshell' configuration saving on freight and resulting in a very competitive price for you.
- And don't miss the latest addition to our expanding AquaSoft CL line of water softeners on page 50. The PES24CC-844-CL is a two tank unit with a smaller mineral tank perfect for low to moderate hardness and lower water usage applications – *and it is priced right!*

We know how competitive and difficult the market is right now. We are working hard to add products that make you money. We want to make changes that make it easier for you to do business with us. But in the end, with all the changes, we want to "keep things the same."

***For over Three Generations, you, your fathers and grandfathers have counted on McDermott Pumps to be your supplier of choice— that is something we have NO intention of changing.***

Tom McDermott, Jr.

*A.I. McDermott and friends at our Annual McDermott Dealer Meeting - circa 1960*

*Here's a list of some of the changes in our August 2011 Catalog*

**ITEMS MAKING THEIR FIRST APPEARANCE IN THIS CATALOG HAVE THEIR PART NUMBER SHADED FOR QUICK IDENTIFICATION!**

- P. 14 **Added** three (3) of the most popular **Goulds** Bruiser 3 Wire, 230 Volt Submersibles: 1/2 HP, 3/4 HP and 1HP – Part Numbers: GOU10SB05412CL, GOU10SB07412CL and GOU10SB10412CL respectively. These are the composite fitted **Goulds** Submersibles which perform great but are a bit less money than **Goulds'** Stainless Steel GS Series.
- P. 19 **Added** **Amtrol's** Guardian Constant Pressure Digital Pump Control, Part Number: AMTCP. **Amtrol's** Guardian operates 115 Volt or 230 Volt Pumps up to 2HP and provides a 10PSI to 55PSI differential with a maximum cutout setting of 80PSI. The control also provides a low water cutoff feature and excessive amp draw and voltage protection.
- P. 21 **Added** **Red Jacket's** RED100RJDS – this is **Red Jacket** Pump's 1HP, 115/230Volt "QuickSet" Deep Well Jet Pump designed for quick and easy installation. Depending on the type of jet assembly and injector this 1HP Deep Well Jet will deliver from 7 to 10 GPM at a jet assembly setting of 50FT.
- P. 26 **Added** another popular Brass Short Tank Tee. Part Number: GWABAT1002SF. This tank tee is 1" FIP with two (2) 1/2" and two (2) 1/4" ports.
- P. 29 Found a new source for Flow Control Valves! All valves from 3GPM to 10GPM are priced the same. *A 35% savings over the Dole Flow Control Valves we used to handle!*
- P. 31 **Added** 2" X 20" MIP X MIP Schedule 120 PVC Drop Pipe from **Johnson Screen**. Part Number: MOP2X20MM. This NEW 2" PVC Drop Pipe is perfect for deeper pump settings. We also added a 2" Stainless Steel Coupling, part number MOPSSDC200 for connecting this new heavy duty PVC Drop Pipe. *The combination of Schedule 120 PVC and the strength of Stainless Steel Couplings makes this a sure way to set your bigger pumps!*
- P. 32 Wanted you to know that **SJE-Rhombus** has expanded their 120V and 230V Mechanical Double Float Switches' Pumping Range from 3" to 48"! This was a big deal in the initial conversion from mercury to mechanical switches but the engineers at **SJE** addressed the concerns and have delivered! *Check it out.*
- P. 33 **Added** a Filter Maintenance Plate for **Bear OnSite** Effluent Filters to allow you to Clean the Filter without Pumping the Tank! Part Number: BRO9-MAIN. Another thoughtfu product addition from Theo Terry and the on-site experts at **Bear OnSite**.
- P. 34 **Added** a note about the availability of **Pentair's** exciting **NEW** line of German engineered grinders and non-clogs: **Jung Pumpen**. Europe's number one brand in drainage technology, **Jung Pumpen's** sophisticated and competitive line of grinders and non-clogs from 2HP to 7-1/2HP is now available in the USA! *Contact your McDermott sales rep or Jay Pokrandt in Oshkosh for specifications and quote info.*
- P. 37 **Bord na Mona is now Anua!** The revolutionary peat pod manufacturer from Ireland has renamed itself Anua. *Same great people and same great product – just a new name!*
- P. 38 **We've made the change!** And just in time too – **Infiltrator** now offers two (2) series of poly septic tanks. First is the familiar orange TW Series poly tank in sizes from 300 to 1500 gallons. Second is the exciting new addition to the **Infiltrator** family – the IM Series of poly septic tank which is shipped in a 'clamshell' configuration and assembled by us at McDermott's. You'll see by the pricing that because of the smaller shipment footprint the IM Series is very competitive. The IM series is currently only available in 1060 gallon single and two compartment sizes. Additionally we are now using **Infiltrator's** TW risers in 24" x 6", 24" x 12" and 24" x 18" sizes. *Please check out all the tank sizes, information and accessories on page 38 – we have both the TW Series and IM Series tanks in stock and are ready to ship. Give us a call today!*
- P. 39 **Added** **Polylok's** 20" Diameter Distribution Box with up to 8 Holes! Part Number: POL3017-20. Also added **Polylok's** 20" x 12" Distribution Box Riser, part number POL3009-R12.
- P. 50 **Added** the PES24CC-844-CL **AquaSoft CL** .85 Cubic Foot Unit with the '3-2' Clack Control Valve. This two (2) tank unit comes with an 8" x 44" mineral tank and standard brine tank and is a perfect fit for those jobs with low to moderate hardness and lower water usage. *Very competitively priced!*
- P. 53 **Added** seven (7) **A.O. Smith** parts for the **NEW** 300 Series AOSGCV and PEHGGV Gas Water Heaters. The parts include the natural and LP gas valves, burner door assemblies for multiple sizes, the pilot assembly and thermopile for all GGV/GCV Series 300 heaters. **A.O. Smith** has finally done it – they replaced their trouble prone gas valves with a winner – same one as the competition uses! *Check it out!*
- P. 54 **Added** the **NEW** **Noritz** NRC98DV 2-Pipe PVC Vented High Efficiency Condensing Tankless Gas Water Heaters in Natural and LP Gas. This is the one you've been waiting for – High Efficiency, Easy and Inexpensive PVC Venting and a Great Price! *Put it all together and you've got an installed unit with an attractive consumer price point from the world leader in tankless technology – Noritz!*
- P. 60 **Added** **Weil McLain's** **NEW** AquaPlus Indirect Fired Hot Water Heaters! We added five (5) new indirect heaters. These heaters use a stainless steel inner coil resulting in higher heat transfer, faster first hour recovery and more usable hot water for the consumer. Available in **Weil McLain** Gold or Pewter to match **Weil McLain's** **Ultra** Series Boilers.
- P. 61 **Added** Maintenance Kits for **Weil McLain's** **Ultra** Boilers. We offer two (2) kits: WML383-500-605 for **Ultra** 80 and 105 Boilers and WML383-500-620 for **Ultra** 155 to 399 Boilers. Each Maintenance Kit includes electrode, electrode gasket, cover gasket, system water test kit and miscellaneous hardware for the installation of parts. *If you've done any Weil McLain Ultra Boiler work these kits are handy to have for tune-up and service calls!*
- P. 63 Want to advise you of a running change with **Taco's** Brass Shut-Off Flange Sets. **Taco** has made a clever improvement to its Shut-Off Flange Sets – Now the 3/4", 1" and 1-1/4" Flange Sets come with a Swivel feature that allows you to adjust the Shut-Off Handle for easy access regardless of the pump location. *Great idea and solves a common headache!*
- P. 65 **ANNOUNCEMENT!** Effective September 1, 2011 **OmegaFlex** will be discontinuing its yellow jacketed **TracPipe** corrugated stainless steel gas pipe and transitioning ALL its flexible gas pipe to its **Counterstrike** product. We will sell the yellow **TracPipe** while supplies last and then convert everything to the **Counterstrike** line.
- P. 71 Updated our information on **SJE-Rhombus'** line of Mechanical Pump and Control Switches as a result of the Mercury Ban of October 2010. Chart shows switch models and their specifications, including voltage, amp draw and pumping range.
- P. 72-73 Updated Delivery Schedules for ALL McDermott Locations – Including our **Daily Delivery Schedules** – *Check it out!*
