Thin Nose
Crimper

MPT1
Stripper/Crimper

Rubber
Strap

YOUR WELL & PUMP CODE NR812 - PLEASE REMEMBER:

One; Codes ('rules') can be changed within the Bureau of Drinking Water and Groundwater, Private Water Systems Section itself, without going to the Legislature, so if you have a problem with the Code, discuss it with the Private Water Section. Everyone wants a "workable" document.

Two; NR 812 allows for variance requests when a Code requirement is not feasible or is unreasonable. 1-608-267-7649

Three; when working on a noncomplying well, that feature you work on must be brought into compliance. Other apparent and known noncomplying features **not worked on, need not be brought into compliance, but must be reported by you, or the water system owner, or user, to the DNR within 10 days using DNR FORM 3300-221, Rev. 11-05. (NR812) For everyone's sake, do not leave an unsafe well, UNSAFE, for any reason.**

The State has an established WELL DRILLING & PUMP ADVISORY COMMITTEE which meets approx. every four months. This is an 'Open Meeting'. If YOU have a beef about the Code or its enforcement it is up to YOU to contact the State, the Wis. Water Well Assoc., or Tom McDermott, Jr., Committee Co-Chair, to work to correct whatever you figure is wrong.

Properly abandon bad wells. Get All Forms from us, or:

DNR South Central Region
(608) 275-3266

DNR Northeast Region
(920) 662-5100

DNR Southeast Region
(414) 263-8500

DNR West Central Region
(715) 839-3700

DNR Northern Region-
Rhineland
(715) 365-8900

DNR Northern Region-Spooner
(715) 635-2101

For a complete listing of DNR Regional Drinking Water and Groundwater Staff, go to www.mcdermottpumps.com click 'Links'; 'Regulatory Agencies'; 'WI DNR Bureau of Drinking Water & Groundwater'; go to bottom of left side under Resources and click 'Contacts'. This will take you to an interactive state map and a list of names and phone numbers by region. Or call us at (800) 242-0357 and we will 'link' for you and give you the information you need!
